### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Claims 1-10 have been carefully considered in view of the specification and figures 5-7 of the invention.

The references of the record fail to teach or suggest:

a current conversion device that converts through a coordinate conversion the current detected by the current detection device to a d-axis current and a q-axis current in a dq-axis coordinate system which rotates in synchronization with rotation of the motor;

a phase calculation device that calculates a phase of the rectangular wave voltage based upon a q-axis current deviation between a q-axis current command value and the q-axis current; and

a power conversion device that generates the rectangular wave voltage having the phase calculated by the phase calculation device from a DC source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **COMMUNICATION INFORMATION**
